5640 Kelekent Ave, Kentwood, MI

616-929-3330 | fantimmywu@gmail.com | [linkedin.com/in/wutimmy](https://www.linkedin.com/in/wutimmy)

Experience

Hayward Quartz Technology Inc

Fremont, CA

Software Developer | React, Node.js, C#, C++

Oct 2024 – Mar 2025

- Integrated components to an enterprise resource planning software, Epicor Kinetic, enhancing ease of use for users
- Implement features on a large variety of small scale projects, for diverse application needs
- Maintained and fixed bugs in internal websites, ensuring continued usability and minimizing downtime for internal users
- Collaborated with QA to gather requirements and implement specialized internal programs

Michigan State University

East Lansing, MI

Software Developer | React, Python, AWS, NPM

Jan 2024 – Apr 2024

- Collaborated in a team of five SDEs to design and implement [Employee Badge Image Validation Tool](#)
- Mentored directly by Amazon employees to produce a fully functional web application
- Produced a machine learning model with an 87% accuracy in detecting valid badge images
- Operated within an Agile Scrum framework, adapting to changes through iterative development and effective collaboration

Skills

Programming Languages: Python, C++, C#, C, JavaScript, HTML, CSS, Java, SQL

Technologies: React, Node.js, Flask, BepInEx, MySQL, PostgreSQL, SQLite, NPM

Tools: Epicor, Git, Amazon AWS, Docker, Google Cloud Platform, GitHub, GitLab, Figma, ILSpy

Projects

Web Portfolio | Javascript, Flask, Python, Docker

Jan 2024 – Apr 2024

- Developed a personal web portfolio as part of a course on contemporary web application development techniques
- Implemented user authentication with login and registration functionality
- Designed and implemented 6 local database functions to securely manage user login credentials

Lethal Company Game Plugin | C#, BepInEx, ILSpy | [GitHub Link](#)

Dec 2023 – Apr 2024

- Developed a utility mod to the game Lethal Company that allows users to explore game mechanics
- Implemented a configuration system for 6 mod settings and hotkey support

Nightvision Mod | C#, BepInEx, ILSpy | [GitHub Link](#)

Dec 2023 – Apr 2024

- Collaborated on the development of a nightvision mod to a game to see in the dark
- Achieved over 30,000 downloads, demonstrating strong user interest

Facebook Clone | HTML, SCSS, React, Python, Flask

Feb 2022 – Apr 2022

- Integrated multithreaded sockets and server sent events to create a live chat room application between 2 users
- Built a REST API to handle 10+ simultaneous user requests while preventing vulnerable side effects

Sparty Game | C++

Jan 2022 – Apr 2022

- Worked in a team of five to develop a 2D platformer game using C++
- Conducted code reviews in an agile format to ensure coding standards and improve overall code quality
- Implemented character mechanics, including jumping, running, and collision detection, ensuring smooth gameplay

Education

Michigan State University

East Lansing, MI

Bachelor of Science in Computer Science

Apr 2024

Hobbies

Game Development/Modding

Nov 2018 – Apr 2024

- Explored game development as a hobby, gaining foundational knowledge in game design principles and programming concepts
- Created game prototypes using game engines such as Gamemaker Studio 2 and Unity
